SUMMARY

Full Stack Developer focused on building **zero-to-one products** using **Next.js, React, TypeScript, Node/Spring Boot**, and PostgreSQL. Experienced in owning features end-to-end — from UI and APIs to authentication, workflows, and deployment. Strong interest in **Generative AI, automation**, and building real-world systems with high ownership in fast-moving startup environments.

EDUCATION

Abdul Kalam Technical University	Varanasi, India
Master of Computer Applications (MCA)	*2023 – 2025*
Mahatma Gandhi Kashi Vidyapeeth	Varanasi, India
Bachelor of Computer Applications (BCA)	*2019 – 2022*

EXPERIENCE

PMGlob Technology — Sep 2025 – Dec 2025
Full Stack Developer Intern — *Noida, India*

- Built and maintained full-stack features using React, REST APIs, and PostgreSQL
- Designed secure authentication flows using JWT-based access and refresh tokens
- Collaborated directly with senior developers to ship production-ready features
- Worked across frontend, backend, and database layers instead of siloed tasks
- Improved API performance and reliability through structured service design

PROJECTS

WhatsApp Business Automation SaaS | *Next.js, TypeScript, Spring Boot, PostgreSQL* — Dec 2025 – Present

- Building a zero-to-one SaaS platform to automate WhatsApp workflows and campaign messaging for small businesses
- Developed frontend using Next.js, React, and Tailwind CSS with reusable component-driven UI
- Designed backend services with Spring Boot and REST APIs to manage workflows, campaigns, and users
- Implemented JWT-based authentication and subscription lifecycle management
- Created a mock WhatsApp API layer to unblock development and validate workflows early
- Focused on scalability, clean architecture, and fast iteration based on real usage scenarios

Viraam Vani – Coaching & Learning Platform | *React, Node.js, MongoDB* — 2025

- Built and deployed a full-stack learning platform with responsive UI and dynamic content
- Implemented frontend using React and Tailwind CSS for modern, mobile-friendly design
- Developed backend APIs using Node.js and Express for content and user management

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, ShadCN UI
Backend: Node.js, Express.js, Spring Boot, REST APIs, JWT
Databases: PostgreSQL, MongoDB, MySQL
GenAI & Tools: OpenAI APIs (basic), Prompt Engineering, ChatGPT-assisted development
Dev Tools: Git, GitHub, Docker, Postman, Swagger
